

Login

The screenshot shows a web browser window with the address bar displaying "不安全 https://192.168.1.1/cgi-bin/ssl/index.asp". The page header includes the D-Link logo, "Model Name: DSL-X3052E", and "Firmware Version: EU_1.01b04". The main content area features a login form with the label "Admin Password:", a text input field, and a "Log In" button.

Step 1.

Connect to device's GUI through the default IP address (<https://192.168.1.1>) as shown on image.

Step 2.

Login with admin password.

Step 3.

Go to next page

Select management item

The screenshot shows the D-Link web interface for a DSL-X3052E router. The browser address bar displays `https://192.168.1.1/cgi-bin/ssl/index.asp`. The navigation bar includes links for Home, Settings, Features, Management (highlighted with a red box), and Logout. Below the navigation bar, a red circle and the text "Internet Disconnected" are visible, along with a message: "Click on any item in the diagram for more information." A network diagram shows the Internet connected to the DSL-X3052E router, which is then connected to a computer. The "Management" dropdown menu is open, showing options: Time & Schedule, Log Info, System Settings, Firmware Upgrade (highlighted with a red box), OTA, Statistics, and Diagnostics. Below the diagram, the "Internet" status is detailed:

Internet	
Internet Type:	VDSL
Cable Status:	Disconnected
Link Rate:	Not Available
Connection Type:	DHCP
Network Status:	Disconnected

Additional network information is displayed on the right:

4G / DSL / IPv4 / IPv6 / VPN	
MAC Address:	Not Available
IP Address:	Not Available
Subnet Mask:	Not Available
Default Gateway:	Not Available
Primary DNS Server:	Not Available
Secondary DNS Server:	Not Available

Step 1.

Drop-down "Management" item in the toolbar

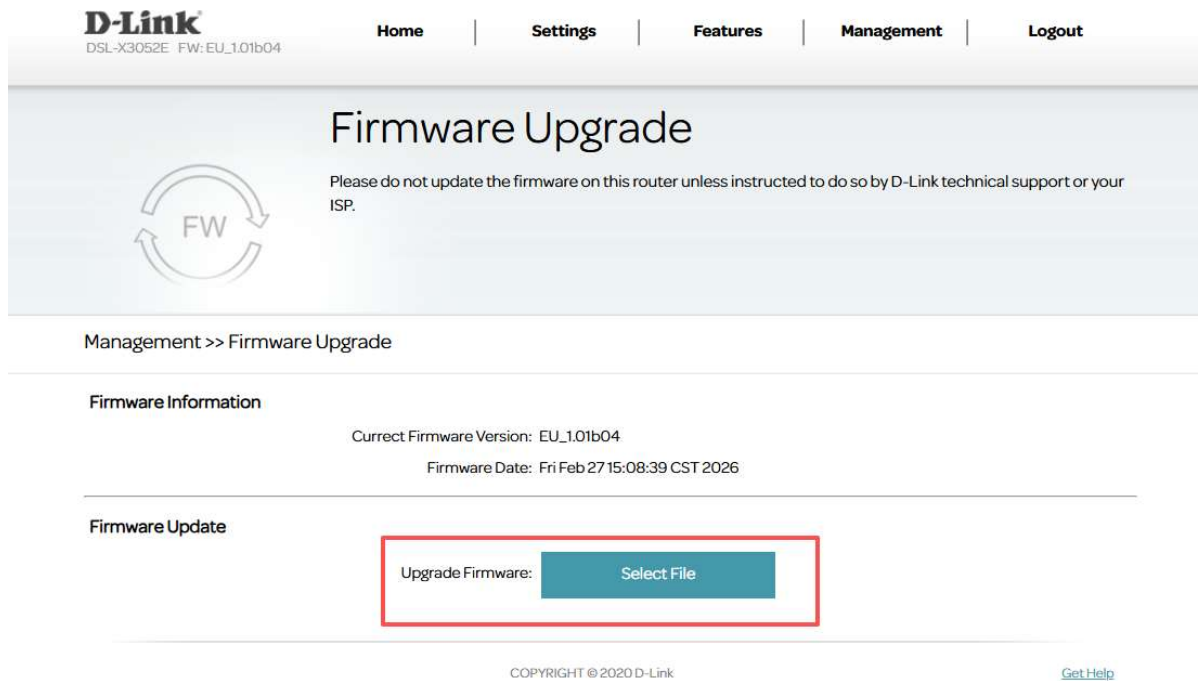

Step 2.

Selected "Firmware Upgrade" item.

Step 3.

Go to next page

Upgrade new firmware

D-Link
DSL-X3052E FW: EU_1.01b04

Home | Settings | Features | Management | Logout

Firmware Upgrade

Please do not update the firmware on this router unless instructed to do so by D-Link technical support or your ISP.

Management >> Firmware Upgrade

Firmware Information

Current Firmware Version: EU_1.01b04
Firmware Date: Fri Feb 27 15:08:39 CST 2026

Firmware Update

Upgrade Firmware: [Select File](#)

COPYRIGHT © 2020 D-Link [Get Help](#)

Step 1.

Go to Firmware Upgrade option.

Step 2.

Selected "Select File" item.

Step 3.

Please select the location where you saved the downloaded firmware file in your laptop.
