Power Usage

ErP Power Usage

This device is an Energy Related Product (ErP) with High Network Availability (HiNA) that automatically switches to a power-saving Network Standby mode within 1 minute of no packets being transmitted. If it is not needed during certain periods of time, it can be unplugged to save energy.

Ethernet Cable

Quick Installation Guide

If any of the above items are missing or damaged, please contact your local reseller.

Note: Using a power supply with a different voltage rating from the one included with the device may cause damage and void the warranty for this product.

System Requirements

Network Requirements	• An Ethernet-based cable, DSL or fiber modem • IEEE 802.11ax/ac/n/g/b/a wireless clients • 10/100/1000 Mbps Ethernet
Web Management Requirements	Computer with the following: • Windows, Macintosh, or Linux-based operating system • An installed Ethernet adapter or Wi-Fi interface Browser requirements: • Microsoft Edge • Mozilla Firefox 28 or higher • Apple Safari 6 or higher • Google Chrome 28 or higher
D-Link SetupGo App Requirements	• iOS® or Android™ device (Please refer to the app's store page to check whether your device is compatible.)

Introduction

The S30 AX3000 Wi-Fi 6 Router delivers high-speed, reliable wireless connectivity for modern homes and small offices. Powered by advanced Wi-Fi 6 technology, it enhances network efficiency and capacity in busy environments while reducing congestion across connected devices. With dual-band wireless speeds of up to 2,976 Mbps, Gigabit Ethernet connectivity, and advanced WPA3 security, the S30 provides a fast, secure, and dependable networking experience for streaming, gaming, video conferencing, and everyday Internet use.

Features

High-Speed Wi-Fi 6 Performance

Leveraging Wi-Fi 6 (802.11ax) technology, the S30 delivers faster wireless speeds, improved efficiency, and greater capacity for connected devices. Advanced technologies such as OFDMA and MU-MIMO help reduce network congestion, improve throughput, and enable more devices to connect simultaneously without compromising performance. With combined dual-band speeds of up to 2,976 Mbps, users can enjoy smooth 4K streaming, online gaming, and large file transfers.

Guest Zone and Cyber Protection

The built-in Guest Zone helps safeguard personal devices and sensitive information while allowing guests to connect conveniently. The network is also protected with the latest WPA3 encryption, providing enhanced wireless security for connected devices. Additional security features, including DoS protection, IP/MAC address filtering, and website filtering, help defend against network threats and block access to potentially malicious websites.

Flexible Network Expansion

The S30 supports multiple operation modes, including Router Mode, Bridge Mode, and Repeater Mode, allowing you to expand existing networks, improve coverage, and adapt the device to different deployment scenarios.

Fast and Convenient Setup

Setup and management are simple with the free D-Link SetupGo app, available for iOS and Android devices. You can quickly configure your network through the mobile app or use the intuitive web-based management interface for more advanced settings and administration. The router also supports Wi-Fi Protected Setup (WPS) for secure one-touch device connection.

Hardware Overview

S30 LED Indicator

1	Power	Solid green	The device is powered on.
		Off	The device is powered off.
2	Internet	Solid green	Internet connection is successfully established.
		Solid red	The Internet port is connected but a connection failure occurs (due to authentication failure, IP assignment failure, session timeout, etc.)
		Off	The Internet port is not connected.
3	LAN	Solid green	Any of the LAN ports is connected.
		Off	No LAN ports are connected.
4	Wireless 2.4G/5G	Solid green	The respective 2.4 or 5 GHz wireless network is enabled.
		Off	The respective 2.4 or 5 GHz wireless network is disabled.
5	WPS	Blinking green	The WPS process is in progress. After pressing the WPS button, the WPS LED will blink for up to 120 seconds. If a device successfully connects via WPS, the blinking will stop.
		Off	WPS is idle.

S30 Rear Panel

1	Reset Button	The reset button restores the router to its factory default settings. Insert a paperclip into the hole, press and hold for about 10 seconds, then release. During the reset process, all LEDs will turn off and then turn back on.
2	WPS Button	Press this button for about 1 second to quickly connect to a wireless client using Wi-Fi Protected Setup (WPS).
3	Gigabit Internet Port	Supports 10/100/1000 Mbps network speeds. Connect your broadband modem to this port using an Ethernet cable.
4	Gigabit LAN Ports (1- 3)	Supports 10/100/1000 Mbps network speeds. Connect Ethernet devices such as computers, switches, storage (NAS) devices, and game consoles.
5	Power Connector	Connect the included power adapter here to power on the device.

Installation

This section will guide you through the installation of your S30.

Before You Begin

- Placement of a router is very important. Do not place the router in an enclosed area such as a closet, cabinet, attic, or garage.
- Configure the router with a computer that was last connected directly to your Internet connection. Verify that it is connected to the Internet before connecting additional devices.
- If your Internet Service Provider (ISP) provided you with a modem/router combo, you will need to set it to “bridge” mode so that the router can work properly. Please contact your ISP or refer to the user manual of your modem/router device.
- You can only use the Ethernet port on your modem. If you were using the USB connection before using the router, then you must turn off your modem, disconnect the USB cable and connect an Ethernet cable to the Internet port on the router, and then turn the modem back on. In some cases, you may need to call your ISP to change your connection types (USB to Ethernet).
- If connecting to a DSL modem, be sure to have your DSL service information provided by your ISP handy. This information is likely to include your DSL account's Username and Password. Your ISP may also supply you with additional WAN configuration settings which might be necessary to establish a connection.
- If you are connecting a considerable amount of networking equipment, it may be a good idea to take your time to label each cable first or take a picture of your existing setup before making any changes.
- If you have DSL and are connecting via PPPoE, make sure you disable or uninstall any PPPoE software such as WinPoET, BroadJump, or EnterNet 300 from your computer or you will not be able to connect to the Internet.

Wireless Installation Considerations

The D-Link wireless router/gateway lets you access your network using a wireless connection from virtually anywhere within the operating range of your wireless network. Keep in mind that the number, thickness and location of walls, ceilings, or other objects that the wireless signals must pass through may limit the range. Typical ranges vary depending on the types of materials and background radio frequency (RF) noise in your home or business. The key to maximizing wireless range is to follow these guidelines:

General Guidelines

1. Keep the number of walls and ceilings between a D-Link router and other network devices to a minimum - each wall or ceiling can reduce your router's range from 3-90 feet (1-30 meters). Minimize the number of walls or ceilings your router and devices are positioned within.
2. Be aware of the direct line between network devices. A wall that is 1.5 feet thick (0.5 meters) appears to be almost 3 feet (1 meter) thick at a 45-degree angle. At a 2-degree angle, the wall appears to be over 42 feet (14 meters) thick. Position devices for their signals to travel straight through a wall or ceiling (instead of from a certain angle) for better signal reception.
3. Building materials make a difference. A solid metal door or aluminum studs may have a negative effect on range. Try to position extenders, access points, wireless routers, and computers for their signal to directly pass through drywall or open doorways. Materials and objects such as glass, steel, metal, walls with insulation, water (fish tanks), mirrors, file cabinets, brick, and concrete will degrade your wireless signal.
4. Keep your product away (at least 3-6 feet or 1-2 meters) from electrical devices or appliances that generate RF noise.
5. If you are using 2.4 GHz cordless phones or X-10 (wireless products such as ceiling fans, lights, and home security systems), your wireless connection may degrade dramatically or drop completely. Make sure your 2.4 GHz phone base is as far away from your wireless devices as possible. The base transmits a signal even if the phone is not in use.
6. Place your device in an elevated position at least 75 cm above the floor.

Setup

There are several different ways you can use to configure your router to connect to the Internet.

- **D-Link SetupGo App** - Use your compatible iOS or Android device to install and configure your router. Refer to **D-Link SetupGo App Setup on page 9.**
- **Hardware Setup** - This section explains how to set up your S30. Refer to **Hardware Setup on page 10.**
- **Setup Wizard** - The wizard will launch when you log in to the router using your PC for the first time. Refer to **Setup Wizard on page 12.**
- **Manual Setup** - Log in to the router for manual configuration of your router Refer to **Configuration on page 18.**

D-Link SetupGo App Setup

The D-Link SetupGo app enables quick and easy setup of your S30 using compatible Android or iOS devices.

Notes:

1. The screenshots may be different depending on your mobile device's OS version or platform.
2. The D-Link SetupGo app provides step-by-step configuration, and it only allows for basic management after setup.
3. If you attempt to set up a device that has already been configured previously, you will need to reset it to factory defaults before running the app.

Step 1

Search and install the free **D-Link SetupGo** available on the App Store or on Google Play.

D-Link SetupGo

Step 2

Launch the D-Link SetupGo app from the home screen of your device.

Step 3

Tap **Set Up a New Device**. Scan the Setup code on the device label located on the bottom of the router. The **Connect Device** button will appear at the bottom of the screen after the scan is complete. Follow the on-screen instructions to complete the setup.

After completing the initial configuration, you can connect to the device and log in to the web management interface using the wireless credentials and device password created during setup.

Hardware Setup

Step 1

Position the S30 close to your Internet-connected modem. Turn off and unplug the power to your cable or DSL/fiber broadband modem. This is required. In some cases, you may need to turn it off for up to five minutes. Connect an Ethernet cable to the modem and to the Internet port of S30. Next, connect the power adapter and plug S30 into a power outlet.

Step 2

Wait for the S30 to boot up. When the router's LED indicators light up green, wirelessly connect your computer to the Wi-Fi name (SSID) with the default password printed on the device label.

Step 3

Type **https://192.168.200.1/** into a web browser and follow the on-screen instructions to complete the setup.

If you are configuring the router from a PC with a wired Ethernet connection, connect an Ethernet cable from one of the router's LAN ports (LAN1, LAN2, or LAN3) to the Ethernet port on your PC.

Type **<https://192.168.200.1/>** into a web browser and follow the on-screen instructions to complete the setup. For detailed instructions, refer to **Setup Wizard** on **page 12**.

Setup Wizard

The setup wizard is designed to guide you through a step-by-step process to configure your new S30 for Internet connection.

If this is your first time configuring the router, open your web browser and enter **https://192.168.200.1/** into the browser. By default, you do not need to enter a password to **log in** to start the configuration process.

The device's IP address is printed on the device label on the bottom of the device.

The default HTTPS version of the Web management page may display a security warning message alerting you of possible data breach. Refer to the below steps for additional instructions when you see such warning.

When your browser displays a security warning stating, “Your connection isn’t private.” You will also see Not Secure in the address bar, along with HTTPS crossed out with red lines. This is because the device’s default management URL is not an actual Internet website with valid certificates. You can proceed with the setup by following these steps:

1. Click the “Advanced” button.

2. Click "Proceed to the default *management URL*".

Now you will be able to log in to your device.

Note: The default *management IP* 192.168.200.1 may change after the S30 is connected to an uplink router following the initial setup or after a mode change. As a result, the original IP address may no longer be accessible. For further assistance, refer to Questions 1 and 3 in **Troubleshooting on page 65**.

The wizard appears.

Click **Next** to continue.

Select your Internet connection type (this information can be obtained from your ISP). Then click **Next** to continue.

If you select **PPPoE**, enter your PPPoE username and password. If you do not have this information, please contact your ISP.

Click **Next** to continue.

Note: *Be sure to remove all other existing PPPoE software from your computer. The software is no longer needed and will not work with your router.*

The screenshot shows the 'PPPoE' configuration screen. At the top, there is a diagram showing 'Internet' connected to 'S30' (the router) and then to a 'Wi-Fi Client'. Below the diagram, a text box states: 'To set up this Internet connection, you will need the username and password provided by your Internet service provider (ISP)'. There are two input fields: 'Username:' and 'Password:'. At the bottom, there are two buttons: 'Back' and 'Next'.

If you select **Static IP**, enter the IP and DNS settings supplied by your ISP. If you do not have this information, please contact your ISP.

Click **Next** to continue.

The screenshot shows the 'Static IP' configuration screen. At the top, there is a diagram showing 'Internet' connected to 'S30' (the router) and then to a 'Wi-Fi Client'. Below the diagram, a text box states: 'To set up this connection, you will need the IP settings provided by your Internet service provider (ISP)'. There are five input fields: 'IP Address:', 'Subnet Mask:', 'Gateway Address:', 'Primary DNS Address:', and 'Secondary DNS Address:'. At the bottom, there are two buttons: 'Back' and 'Next'.

If you select a DHCP connection, no additional information is required.

Enter a **Wi-Fi Network Name** and **Wi-Fi Password** to set up your Wi-Fi network. The Wi-Fi password must be between 10 and 63 characters in length and include at least 3 of the following character types:

- Uppercase letters (A–Z)
- Lowercase letters (a–z)
- Numbers (0–9)
- Special characters such as %!@#\$()*&

Your wireless clients will need to have this passphrase to be able to connect to your wireless network.

Click **Next** to continue.

Notes:

*The router's **Smart Connect** feature presents a single wireless network. When connecting clients to the configured network, they will be automatically added to the best band, either 2.4 GHz or 5 GHz. To disable the Smart Connect feature and individually configure 2.4 GHz and 5 GHz networks, refer to **Wireless** on **page 32**.*

The image shows a 'Wi-Fi Settings' screen. At the top, there's a diagram showing 'Internet' connected to 'S30' (the router), which is then connected to a 'Wi-Fi Client'. Below the diagram, it says 'To set up your Wi-Fi network, enter a Wi-Fi network name (SSID) and password.' There are three input fields: 'Smart Connect:' with a dropdown menu, 'Wi-Fi Network Name:' with the text 'S30-832C', and 'Wi-Fi Password:' with masked characters '.....'. At the bottom, there are two buttons: 'Back' and 'Next'.

To better protect the router's configuration access, please enter a password. You will be prompted for this password every time you want to use the router's web management interface.

Note: Click **Sync WiFi Password** to make the admin password the same as the Wi-Fi password configured above. The password must contain 10 to 63 characters and include at least 3 of the following character types:

- Uppercase letters (A–Z)
- Lowercase letters (a-z)
- Numbers (0-9)
- Special characters such as %!@#\$()*&

Click **Next** to continue.

You will be presented with a summary of your settings. Click **Next** to finalize the settings or **Back** to make changes.

Configuration

Accessing the Web Management Interface

1. Type **https://192.168.200.1/** in the address bar.

Note: The default *management IP 192.168.200.1* may change after the S30 is connected to an uplink router following the initial setup or after a mode change. As a result, the original IP address may no longer be accessible. For further assistance, refer to Questions 1 and 3 in **Troubleshooting on page 65**.

2. Enter the admin password.

- If this is your first time logging in, please enter the password printed on the device label located on the bottom of the device.
- If you have previously completed the Setup Wizard, enter the password you created during initial setup.
- If you can't remember your password for login, press the Reset button to restore the router to its default settings.

The router's home page will display its current connection status.

The top panel provides quick access to **Settings**, **Features**, and **Management**.

Note: The system will automatically log out after a period (300 seconds) of inactivity.

Home

The **Home** page displays the current status of your network in the form of an interactive diagram. You can click on each icon to display information about each node of the network in the middle of the screen. The menu bar at the top of the page will allow you to quickly navigate to other pages. Refer to the following pages for a description of each section.

Internet

Click on the **Internet** icon to bring up more details about your Internet connection, for example, connection type and uptime.

The **Home** page displays whether or not the router is currently connected to the Internet. If it is disconnected, click **Click to repair** to bring up the Internet Settings page, refer to **Internet Settings on page 23** for more information. You can also click **Go to settings** at the bottom right to access the Internet Settings page.

Connected Clients

Click on the **Connected Clients** icon to view details about the clients currently connected to the router.

To edit each client’s settings, click the pencil icon on the client you want to edit.

Edit Device Name

Name Displays the name of this client. You can edit the client's name here.

MAC Address Displays the MAC address of the device.

IP Address Displays the current IP address of this client.

Click **Save** when you are done.

Edit device name

Name:

Save

Settings

Operating Mode

Go to **Settings > Operating Mode** to select your operation mode. Depending on your network architecture, you can configure the router to function as one of the following types of network device: router, repeater, or bridge.

Router Mode: In this mode, the router directly connects to the Internet provided by your ISP (Internet Service Provider). All client devices from a network group are connected and managed under this router. This is the default mode.

Bridge Mode: In this mode, the router extends your existing network and improves overall Wi-Fi coverage. Under this mode, the DHCP Server, and Firewall settings rely on the existing router.

Repeater Mode: In this mode, this device acts as a repeater to connect your wireless devices, expanding Wi-Fi coverage. It provides connectivity between various wireless devices. This can be useful if you already have an existing wireless router.

Note: After a mode change, the default IP address (192.168.200.1) may change when the S30 is connected to an uplink router. For further assistance, refer to Questions 1 and 3 in **Troubleshooting on page 65**.

Operation Mode Settings

Router Mode Select Router Mode to run this device as a router.

Repeater Mode Select Repeater Mode to connect to an uplink router wirelessly. For Repeater mode, enter the Wi-Fi name and password to uplink to an existing router or click Scan to scan for available wireless networks. Enable **Sync with Upper Router** to use the existing router's Wi-Fi credentials for the extended network.

Bridge Mode Select Bridge Mode to connect to an uplink router via Ethernet.

The screenshot shows the 'Operating Mode' settings page. At the top, it says 'You can set the router to operate in different modes: Router, Repeater, or Bridge Mode.' Below this is a section titled 'Settings >> Operating Mode'. Underneath, there is a section for 'Existing Network'. On the right side of this section, there is a 'Connection:' label followed by a dropdown menu. The dropdown menu is open, showing four options: 'Router' (which is highlighted with a blue bar), 'Router', 'Bridge Mode', and 'Repeater'.

Internet Settings

IPv4

Go to **Settings** > **Internet** to see the Internet configuration options.

To configure IPv6 Internet and view the network's connection details, click on the **IPv6** tab. Refer to **IPv6** on **page 27**.

Click **Save** at any time to save the changes you have made on this page.

My Internet Connection Is

Choose your Internet connection type from the drop-down menu. You will be presented with the appropriate options for your connection type. Click **Advanced Settings...** to expand the list and see all of the options.

The screenshot shows the 'Internet' configuration page. At the top, there's a breadcrumb trail 'Settings >> Internet >> IPv4' and a 'Save' button. Below this, a dropdown menu for 'My Internet Connection Is:' is set to 'Dynamic IP (DHCP)'. To the right of this dropdown is a link for 'IPv6' and an 'Advanced Settings...' link. The main configuration area includes fields for 'Host Name:' (set to 'S30'), 'Primary DNS Server:', 'Secondary DNS Server:', 'MAC Address Clone:' (set to 'd0:32:c3:d6:83:2f' with a 'Current MAC Address' dropdown), and 'MTU:' (set to '1500').

For **Static IP**, refer to **IPv4 - Static IP** on **page 24**.

For **Dynamic IP (DHCP)**, refer to **IPv4 - Dynamic IP (DHCP)** on **page 25**.

For **PPPoE**, refer to **IPv4 - PPPoE** on **page 26**.

To configure an **IPv6** connection, click the IPv6 link. Refer to **page 27**.

IPv4 - Static IP

Select **Static IP** if your IP information is provided by your Internet Service Provider (ISP). Click **Save** at any time to save the changes you have made on this page.

Static IP Settings

- IP Address** Enter the IP address provided by your ISP.
- Subnet Mask** Enter the subnet mask provided by your ISP.
- Default Gateway** Enter the default gateway address provided by your ISP.
- Primary DNS Server** Enter the primary DNS server IP address assigned by your ISP.

Advanced Setting

- Secondary DNS Server** Enter the secondary DNS server IP address assigned by your ISP.
- MAC Address Clone** Use the drop-down menu to set the Internet port’s MAC address to the WAN or LAN interface, a connected client’s MAC address, or a custom 12-character hexadecimal address.
- MTU** Maximum Transmission Unit - The default is 1500. You may need to change the MTU for optimal performance with your ISP.

Settings >> Internet >> IPv4

Subnet Mask:

Default Gateway:

Primary DNS Server:

Secondary DNS Server:

MAC Address Clone: d0:32:c3:d6:83:2f Current MAC Address

MTU: 1500

IPv4 - Dynamic IP (DHCP)

Select **Dynamic IP (DHCP)** to automatically obtain IP address information from your ISP. Select this option if your ISP does not specify an IP address for use. Click **Save** at any time to save the changes you have made on this page.

Advanced Settings...

Host Name The host name is optional but may be required by some ISPs. Leave it blank if you are not sure.

Primary DNS Server Enter the primary DNS server IP address assigned by your ISP. This address is usually automatically obtained from your ISP.

Secondary DNS Server Enter the secondary DNS server IP address assigned by your ISP. This address is usually automatically obtained from your ISP.

MTU Maximum Transmission Unit - The default is 1500. You may need to change the MTU for optimal performance with your ISP.

MAC Address Clone Use the drop-down menu to set the Internet port's MAC address to the WAN interface, a connected client's MAC address, or a custom value.

The screenshot shows the 'Internet' configuration page. At the top, it says 'Internet' and 'Use this section to configure your Internet Connection type. There are several connection types to choose from: Static IP, DHCP and PPPoE. If you are unsure of your connection method, please contact your Internet Service Provider. Note: If using the PPPoE option, you will need to remove or disable any PPPoE client software on your computers.' Below this, there's a breadcrumb 'Settings >> Internet >> IPv4' and buttons for 'IPv6' and 'Save'. The 'My Internet Connection is:' dropdown is set to 'Dynamic IP (DHCP)'. There's an 'Advanced Settings...' link. The 'Host Name' field contains 'S30'. The 'Primary DNS Server' and 'Secondary DNS Server' fields are empty. The 'MAC Address Clone' dropdown is set to '00:32:c3:09:83:2f' and the 'Current MAC Address' dropdown is set to 'Current MAC Address'. The 'MTU' field contains '1500'.

IPv4 - PPPoE

Select **PPPoE** if your ISP provides PPPoE connection information and requires you to enter a PPPoE username and password to connect to the Internet. Click **Save** at any time to save the changes you have made on this page.

PPPoE Settings

Username Enter the username provided by your ISP.

Password Enter the password provided by your ISP.

Advanced Settings...

Service Name The service name is optional but may be required by some ISPs. Leave it blank if you are not sure.

Primary DNS Server Enter the primary DNS server IP address assigned by your ISP. This address is usually automatically obtained from your ISP.

Secondary DNS Server Enter the secondary DNS server IP address assigned by your ISP. This address is usually automatically obtained from your ISP.

MAC Address Clone Use the drop-down menu to set the Internet port's MAC address to the WAN interface, a connected client's MAC address, or a custom value.

MTU Maximum Transmission Unit - The default is 1492. You may need to change the MTU for optimal performance with your ISP.

The screenshot shows the 'Settings >> Internet >> IPv4' configuration page. At the top right are tabs for 'IPv4' and 'IPv6', and a 'Save' button. The main section is titled 'My Internet Connection is:' with a dropdown menu set to 'PPPoE'. Below this are input fields for 'Username:' and 'Password:'. To the right of the password field is a link for 'Advanced Settings...'. Further down, there is an 'Address Mode:' dropdown set to 'Dynamic IP'. Below that are input fields for 'Service Name:', 'Primary DNS Server:', and 'Secondary DNS Server:'. At the bottom, there is a 'MAC Address Clone:' section with a text box containing 'D0:32:C3:D6:7E:00' and a dropdown menu labeled 'Default MAC Address'.

IPv6

Go to **Settings > Internet** to see the Internet configuration options for IPv4, then click the **IPv6** tab to access the configuration options for IPv6.

To configure the IPv4 Internet and view the network connection details, click the **IPv4** tab. Refer to **IPv4 on page 23** for more details.

Click **Save** at any time to save the changes you have made on this page.

Wireless

From this page you can configure your Wi-Fi settings. Click **Save** at any time to save the changes you have made on this page.

Smart Connect

Status Enable or disable the Smart Connect Feature. The Smart Connect feature presents a single wireless network. When connecting clients to the network, the clients will be automatically added to the best band, i.e. 2.4 GHz or 5 GHz.

If Smart Connect Status is Enabled:

Wireless

- Wi-Fi Name (SSID)** Enter a name for your Wi-Fi network. Up to 32 characters are allowed.
- Security Mode** Choose **Open**, **WPA-PSK**, **WPA2-PSK (default)**, **WPA3-SAE**, **WPA/WPA2-PSK**, or **WPA2-PSK/WPA3-SAE**. WPA3 provides the highest level of encryption among these. Note that WPS will be disabled when the Security Mode is set to WPA-PSK or WPA3-SAE.
- Password** Create a Wi-Fi password that's 10 to 63 characters long and contains at least 3 of the following character types: uppercase letters, lowercase letters, numbers, and special characters. Wireless clients will need to enter this password to successfully connect to the network.

Wireless

Use this section to configure the wireless settings of your router. Changes made on this page may also need to be applied to your wireless devices.

Features

Firewall

The integrated firewall helps protect your network from malicious attacks over the Internet. Go to **Features > Firewall** to access the **Advanced** page.

To configure the IPv4 firewall rules, click the **IPv4 Rules** tab. Refer to **Firewall Settings - IPv4/IPv6 Rules** on **page 42**.
To configure the IPv6 firewall rules, click the **IPv6 Rules** tab. Refer to **Firewall Settings - IPv4/IPv6 Rules** on **page 42**.
To configure the Website firewall rules, click the **Website Filter** tab. Refer to **Firewall Settings - Website Filter** on **page 44**.

Click **Save** at any time to save the changes you have made on this page.

Advanced Firewall Settings	
Anti-DoS attack	Enable or disable protection against Denial-of-Service (DoS) attacks that could disrupt normal router operation.
Enable Remote Management	Enable remote management over the Internet.
Remote Admin Port	The port number used for accessing the device's web management interface. The default port number is 8080 .
WAN Ping	Controls whether your router replies to ICMP echo requests coming from the Internet.
PPTP PassThrough	Controls whether devices inside your network (LAN) can establish outbound VPN connections using the PPTP (Point-to-Point Tunneling Protocol) through the router.
L2TP PassThrough	Controls whether devices inside your LAN can make outbound VPN connections using the L2TP (Layer 2 Tunneling Protocol) through the router.
IPSec PassThrough	Controls whether devices on your LAN can create outbound VPN connections using the IPSec (Internet Protocol Security) protocol through the router.

Firewall Settings - IPv4/IPv6 Rules

The IPv4/IPv6 Rules section is an advanced option that lets you configure what traffic is not allowed to pass through the network. Go to **Features > Firewall**, then click the **IPv4 Rules** tab or the **IPv6 Rules** tab to configure rules for filtering the Internet traffic based on parameters like IP address and ports.

To configure the Firewall Advanced settings, click the **Advanced** link. Refer to **Firewall** on **page 41**.

To remove a rule, click on the trash can icon in the Delete column. To edit a rule, click on the pencil icon in the Edit column.

Firewall Settings - IPv4/IPv6 Rules

To create a new blocking rule, click the **Add Rule** button. For IPv6 Rules, you must enable the IPv6 state first (go to **Settings > Internet**).
Click **Save** when you are done.
A maximum of 32 rules can be defined. If you edit or create a rule, the following options will appear:

IPv4/IPv6 Rule	
Name	Enter a name for the rule.
Source IP Address Range (LAN)	Enter the source IP address range (e.g. 192.168.200.1-192.168.200.2 for IPv4 or 2001::1-2001::2 for IPv6) that the rule will apply to. Both a single IP address and a range of IP addresses can be entered.
Destination IP Address Range (WAN)	Enter the destination IP address range that the rule will apply to. Both a single IP address and a range of IP addresses can be entered.
Protocol & Port Range	Select a traffic protocol to deny (TCP , UDP or TCP+UDP) and then enter a single port or a range of ports (e.g. 21-23) that the rule will apply to.
Click Apply when you are done.	

×

Name:

Rule01

Source IP Address Range:

DENY clients access to ONLY these sites

Website URL/Domain	Delete

Add RuleRemaining: 9

Features

Port Forwarding

Port forwarding allows you to specify a port or range of ports to forward to specific devices on the network. This might be necessary for certain applications to connect through the router.

Go to **Features > Port Forwarding**. To configure Port Forwarding, enable the Port Forwarding first.

To create a new rule, click the **Add Rule** button. Click **Save** when you are done. If you edit or create a rule, the following options will appear:

Port Forwarding

Name Enter a name for the rule.

Local IP Enter the IP address of the device on your local network to which the port will be forwarded. Alternatively, select the device from the drop-down menu.

Port Type Select TCP, UDP, or both.

Port Number Enter the TCP or UDP ports (1-65535) that you want to forward. You can enter a single port or a range of ports (for example, 24 or 3000-4000).

Click **Apply** when you are done.

Create New Rule

Name:

Local IP:

<< Computer Name

Port Type:

TCP

Port Number:

1-65535

Apply

You can later remove or edit a rule. To remove a rule, click on its trash can icon in the Delete column. To edit a rule, click its pencil icon in the Edit column.

Virtual Server

The virtual server allows external (WAN) traffic to access a specific device in the local network by mapping external ports to internal IP address and ports. It enables the selection of predefined services with corresponding communication ports for redirection. This might be necessary if you are hosting services behind the router. Go to **Features > Port Forwarding**, then click the **Virtual Server** tab.

To remove a rule, click on its trash can icon in the **Delete** column. To edit a rule, click on its pencil icon in the **Edit** column.

Virtual Server

Your router helps share a single IP address assigned by your Internet service provider among several clients in your home. Virtual servers are preset port mappings for popular services, like a web or e-mail server, that route traffic to a specified client inside.

Features >> Virtual Server

Add Rule

Remaining: 32

Virtual Server

To create a new rule, click the **Add Rule** button. Click **Apply** when you are done. If you edit or create a rule, the following options will appear:

Virtual Server Settings

Name

Enter a name for the rule. Alternatively, select the protocol/ Application from the drop-down menu. Depending on a requested service, the router redirects the external service request to an appropriate internal host.

Local IP

Enter the IP address of the device on your local network to which the external port will forward. Alternatively, select the device from the drop-down menu.

Protocol

Select a traffic protocol to allow or deny (TCP, UDP, or Both).

External Port

If you select TCP, UDP, or Both as the protocol, enter the public port or port range (e.g. 21-23) you want to forward.

Internal Port

If you select TCP, UDP, or Both as the protocol, enter the private port or port range (e.g. 21-23) you want to open.

Create New Rule

Name:

<< Application Name

Local IP:

<< Computer Name

Protocol:

TCP

External Port:

Internal Port:

Apply

DMZ

The DMZ feature allows you to designate one device on your local network to be exposed directly to the Internet, bypassing most of the router’s firewall protection.

Go to **Features > Port Forwarding**, then click the **DMZ** tab.

DMZ Settings

Enable DMZ Enable or disable Demilitarized Zone (DMZ). Devices in this zone are completely exposed to threats over the Internet, and is not recommended unless they are applications that require unrestricted inbound access.

DMZ IP Address If you enabled DMZ, enter the IP address of the client you wish to expose, or use the drop-down menu to quickly select it.

Click **Save** when you are done.

UPNP

Go to **Features > Port Forwarding**, then select **UPNP** to configure the UPNP feature. Universal Plug and Play (UPnP) enables the router to automatically detect and work with compatible network devices, applications, and services. When enabled, UPnP allows these devices to automatically configure port forwarding and firewall settings

UPnP Settings

UPnP Enable or disable Universal Plug and Play (UPnP).

UPNP

After the Universal Plug and Play (UPnP) function is enabled, a computer on a LAN can request a router to perform port conversion automatically. In this way, computers on the Internet can access resources on LAN computers when needed (such as MSN Messenger or Xunlei, BT, PPTV and other applications supporting UPnP protocol), so that you can enjoy a more stable network when watching online videos or using multi-point download and other software.

Dynamic DNS

Most Internet Service Providers (ISPs) assign a dynamic IP address to the router, which may change periodically. Click **Save** at any time to save the changes you have made on this page. The Dynamic DNS (DDNS) feature resolves this issue by linking your changing IP address to a fixed domain name. With DDNS enabled, you can simply enter your registered domain name in a web browser to access your network or server, regardless of IP address changes.

Go to **Features > Dynamic DNS**.

Dynamic DNS Settings

- Enable Dynamic DNS

Enable or disable dynamic DNS. Enabling this feature will reveal further configuration options.
- Status

Displays the current dynamic DNS connection status.
- Server Address

Select a Dynamic DNS provider from the drop-down menu.
- Host Name

Enter the host name that you registered with your dynamic DNS service provider.
- User Name

Enter your dynamic DNS username.
- Password

Enter your dynamic DNS password.

Dynamic DNS

Dynamic Domain Name Service allows your router to associate an easy-to-remember domain name such as [YourDomainName].com with the regularly changing IP address assigned by your Internet Service provider. This feature is helpful when running a virtual server.

Current Firmware Version	The current firmware's version will be displayed.
Check for New Firmware	Click this button to start checking for a new firmware version. If a new version is found, it will prompt you to install it.
Auto Update	
Automatic Upgrade	If enabled, the router will automatically check for and upgrade to the latest firmware available.
Set Update Time	You may set the S30 to automatically upgrade its firmware at a set time by enabling this function. Set the hour and minute for automatic upgrade every day.
Upgrade Manually	
Upgrade Firmware	If you wish to upgrade manually, first download the firmware file you wish to upgrade to. Then, click Select File to find the file and click Upload to install the new firmware.

MAC Filter

This page allows you to restrict clients’ Internet access by specifying their MAC addresses.
Go to **Management > MAC Filter** to configure the MAC Filter list.

Filter Rule

To start configuring a MAC filtering rule, click **Add Rule**:

- Name** Enter the host client’s name.
- MAC Address** Enter the MAC address of the client device.

Click **Apply**.
You can configure up to 24 MAC filtering rules.

MAC Filter

Block specified devices from accessing the Internet through the router.

Management >> MAC Filter

Statistics

This page displays details about your network traffic. To access this page, go to **Management > Statistics**. Click **Clear** to reset the statistics.

On the Statistics page you can view the amount of data that passes through the LAN and wireless interfaces.

You can view **Internet**, **LAN**, **Wi-Fi 2.4 GHz**, or **Wi-Fi 5 GHz** by clicking the respective tab at the top. The real-time graph of network traffic will be shown. To clear the information on the graph, click **Clear**.

The table below for each interface and radio frequency shows the total number of packets and data that are sent and received through the interface.

The traffic counter will reset if the device is rebooted.

D-Link SetupGo App

The D-Link SetupGo app is a convenient app that simplifies the installation of S30. It provides configuration assistance and quick access to essential network settings after the setup. Through the app, you can easily access and manage key network settings, including WAN settings, Wi-Fi configuration, and admin Password.

Note: To manage the S30 using the SetupGo app, you must first connect your device to the S30's Wi-Fi network.

WAN Parameters

The WAN Parameters allows you to configure your Internet connection.

DHCP Select DHCP to allow the router to automatically obtain an IP address and related network parameters (such as DNS server) from your ISP. Tap Next to proceed with automatic configuration.

PPPoE Select PPPoE if your ISP requires login credentials. Enter the username and password provided by your ISP to establish the connection.

Static IP Select Static IP if your ISP has assigned you a fixed IP address. Enter the following details as provided by your ISP: IP address, subnet mask, default gateway, DNS server address.

Wi-Fi Configuration

To set up and customize your Wi-Fi network, enter the following configuration parameters:

Wi-Fi Name Enter a name for the Wi-Fi network.

Wi-Fi Password Enter the password that will be required for client connection.

Dual Band Enable or disable the dual band function. If it is enabled, the clients will be automatically added to the best band, i.e. 2.4 GHz or 5 GHz instead of selecting one network to join manually. If it is disabled, enter the above Wi-Fi name and password for the 2.4 GHz and 5 GHz band individually.

Admin Password Modification

This Admin Password Modification allows you to update and secure your device management credentials.

Admin Password

To change the admin password, first enter the new password, then re-enter the password to confirm. The password must adhere to the following rule:

- Contain 10 to 63 characters.
- Include at least three of the following character types:
 - Uppercase letters (A–Z)
 - Lowercase letters (a–z)
 - Numbers (0–9)
 - Special characters (e.g., !, @, #, \$)

Advanced Mode

The Advanced Mode provides a link to the web management interface.

5:16

< Change Login Password X

Please set the device's management password

New Password

please enter new password

Confirm New Password

please enter new password again

Password Requirements

- Password length must be 10-63 characters
- No spaces allowed
- Must include at least 3 of the following: uppercase letters, lowercase letters, numbers, special characters

Previous

Complete Setup

Connect to a Wireless Client

WPS Button

The easiest way to connect your wireless devices to your Wi-Fi network is through WPS (Wi-Fi Protected Setup). Most wireless devices such as wireless adapters, media players, Blu-ray DVD players, wireless printers, and cameras will have a WPS button that you can press to connect to the router. Please refer to your user manual for the wireless device you want to connect to make sure you understand how to enable WPS. After consulting your device's manual, follow the steps below:

Step 1 - Press the WPS button on the router for about 1 second. The WPS LED on the top will start blinking green.

Step 2 - Within 120 seconds, press the WPS button on your wireless device (or launch the software utility and start the WPS process).

Step 3 - Allow up to 2 minutes for your connection to be configured. Once the LED stops blinking, you will be connected and your wireless connection will be encrypted with the default WPA2 security method.

Windows® 11/10

When connecting to the S30 wirelessly for the first time, you will need to input the wireless network name (SSID) and Wi-Fi password (security key) of the device you are connecting to. Refer to the product label on the bottom of the device for the default Wi-Fi network SSID and password or enter the Wi-Fi credentials set during the initial configuration.

Note: To enjoy the benefits offered by Wi-Fi 6 and WPA3, please make sure that your operating system and wireless network adapter support Wi-Fi 6.

To join an existing network, locate the wireless network icon ( or  in

Windows 10 or    in Windows 11) on the taskbar. For Windows 11, select **Manage Wi-Fi connections**. Then it will display a list of wireless networks which are within your computer's range. Select a desired network by clicking on its SSID.

Or you can set up a wireless networking by visiting the Network Settings page:

In Windows 10, select **Start** , then select **Settings**  > **Network & Internet**  > **Status**  > **Network and Sharing Center**.

In Windows 11, select **Start**, type **control panel**, then select **Control Panel** > **Network and Internet** > **Network and Sharing Center**.

Then select **Set up a new connection or network** and follow the wizard.

To ensure automatic connection to the router when your device next detects the SSID, check the **Connect Automatically** check box.

You will then be prompted to enter the Wi-Fi password (network security key) for the wireless network. Enter the password into the box and click **Next** to connect to the network. Your computer will automatically connect to this wireless network whenever the network is detected.

Troubleshooting

This chapter provides solutions to problems that can occur during the installation and operation of the router. Read the following descriptions if you are having any problems.

1. Why can't I access the web-based management interface?

When entering the IP address of the D-Link router (**192.168.200.1** for example), you are not connecting to a website, nor do you have to be connected to the Internet. The device has the utility built-in to a ROM chip in the device itself. Your computer must be on the same IP subnet to connect to the web-based utility.

- Make sure you have an updated Java-enabled web browser. We recommend the following:
 - Microsoft Edge
 - Mozilla Firefox 28 or higher
 - Google™ Chrome 28 or higher
 - Apple Safari 6 or higher
- Verify physical connectivity by checking for solid link lights on the device. If you do not get a solid link light, try using a different cable, or connect to a different port on the device if possible. If the computer is turned off, the link light may not be on.
- Disable any Internet security software running on the computer. Software firewalls such as ZoneAlarm, BlackICE, Sygate and Norton Personal Firewall may block access to the configuration pages. Check the help files included with your firewall software for more information on how to disable or configure it.

- Configure your Internet settings:

- Go to Start  > Settings  > Network and Internet , click **Advanced network settings**, then click **Internet Options**.
- Click the Security tab, click the Default Level button to reset the selected zone to default settings.
- Click the Connections tab, then click the **LAN Settings** button. Make sure nothing is checked. Click **OK**.
- Close your web browser (if opened) and re-open it.

- Access the web management. Open your web browser and enter the IP address of your D-Link device in the address bar. This should open the login page for your web management.
- If you still cannot access the configuration, unplug the power to the router for 10 seconds and plug back in. Wait for about 30 seconds and try to access the configuration. If you have multiple computers, try connecting using a different computer.

2. What can I do if I forget my password?

If you forget your password, you must reset your router. This process will change all your settings back to the factory defaults. To reset the router, locate the reset button (hole) on the rear panel of the unit. With the router powered on, use a paperclip to hold the recessed button down for about 10 seconds (see **S30 Rear Panel on page 5**). Release the button and the router will go through its reboot process. Wait for about 30 seconds to access the router. The default IP address is **192.168.200.1**.

3. How to access web management interface after changing the device's mode (Repeater or Bridge)?

The device's IP address may change after you modify the Mode Settings (go to **Settings > Operating Mode**). Once the extended network has been successfully established, connect to the network via a wired or wireless connection, then open a web browser and enter the following address to log in to the router: ***https://dlinkrouter.local***.

Wireless Basics

Based on industry standards, D-Link wireless products provide easy-to-use and compatible high-speed wireless connectivity within your home, business, or public accessible wireless networks. Strictly adhering to the IEEE standard, the D-Link wireless products family will allow you to access the data you want, when, and where you want it. You will be able to enjoy the freedom that wireless networking delivers.

A wireless local area network (WLAN) is a cellular computer network that transmits and receives data with radio signals instead of through wires. The latest Wi-Fi 6 generation is introduced to cope with continued increase in the number of devices demanding higher bandwidth and lower latency for responsive, multimedia-rich content.

Wireless LANs are used increasingly in both home and office environments, and at public areas such as airports, coffee shops, and universities. Innovative ways to utilize WLAN technology is helping people work and communicate more efficiently. Increased mobility and the absence of cabling and other fixed infrastructure have proven to be beneficial for many users.

Wireless users can use the same applications they use on a wired network. Under many circumstances, it may be desirable for mobile network devices to link to a conventional Ethernet LAN in order to use servers, printers or for sensors to collect data for cloud-based applications through an Internet connection supplied through the wired LAN. A wireless router or gateway is a device used to provide this link.

What is Wireless?

Wireless or Wi-Fi technology is another way of connecting your computer to the network without using wires. Wi-Fi uses radio frequency to connect wirelessly so you have the freedom to connect computers anywhere in your home or office network.

Why D-Link Wireless?

D-Link is a worldwide leader and also award-winning designer, developer, and manufacturer of networking products. We deliver the performance you need at an affordable price, and offer all the products you need to build your network.

How does wireless technology work?

Wireless technology works just as how cordless phones work: through radio signals, data is transmitted from one point A to point B. But there are restrictions for wireless technology: how you can access the network. You must be within the range of a wireless network area to be able to connect your computer. There are, basically, two different types of wireless networks: Wireless Local Area Network (WLAN) and Wireless Personal Area Network (WPAN).

Wireless Local Area Network (WLAN)

In a wireless local area network, a device called an Access Point (AP) connects computers to the network. The access point has a small antenna attached to it, which allows it to transmit data back and forth over radio signals. With an indoor access point, the signal can travel up to 300 feet away. With an outdoor access point, the signal can reach out up to 30 miles to serve places like manufacturing plants, industrial locations, university and high school campuses, airports, golf courses, and many other outdoor venues.

Wireless Personal Area Network (WPAN)

Bluetooth is the industry standard wireless technology used for WPAN. Bluetooth devices in WPAN operate in a range up to 30 feet away.

Compared to WLAN, both the speed and wireless operation range of WPAN are less than those of WLAN, and WPAN in turn does not consume as much power as WLAN does. This makes it ideal for personal devices, such as mobile phones, PDAs, headphones, laptops, speakers, and other devices that operate on batteries.

Technical Advancements of Wi-Fi 6

Wireless or Wi-Fi technology is another way of connecting your computer to the network without using wires. Wi-Fi uses radio frequency to connect wirelessly, so you have the freedom to connect computers anywhere in your home or office network. Over these years, Wi-Fi, a collection of wireless networking protocols based on IEEE 802.11 standard, has improved continually. The adapter supports Wi-Fi 6 and features the following improvements over the previous wireless generations:

- MU-MIMO (Multi-User Multiple-Input Multiple-Output): Allows multiple devices to receive data simultaneously with multiple data streams.
- UL and DL Orthogonal Frequency Division Multiple Access (OFDMA): channels are divided into subcarriers to allow for simultaneous transmission among multiple devices simultaneously.
- Higher throughput than Wi-Fi 5 (the theoretical maximum is more than double)
- Basic Service Set Coloring (BSS Coloring): Reduces interference by coloring traffic inside a channel.
- Target Wake Time (TWT): Battery-powered devices can efficiently communicate awake and sleep time.

These technical innovations allow for higher speeds, much less latency, more efficient communication with multiple devices simultaneously.

You have probably noticed that more and more household devices support Wi-Fi connectivity, including televisions and home surveillance equipment. As the number of wireless and IoT devices rapidly increases, Wi-Fi 6 brings improved performance for wider-range operation and tackles the problems of resource contention. It improves communication efficiency among multiple devices transmitting data at the same time to achieve better overall bandwidth utilization.

Where is wireless technology used?

Wireless technology is expanding everywhere, not just at home or office. People like the freedom of mobility and it's becoming so popular that more and more public facilities now provide wireless access to attract people. The wireless connection in public places is usually called "hotspots".

Using a D-Link USB adapter with your laptop, you can access the hotspot to connect to the Internet from remote locations like: airports, hotels, coffee shops, libraries, restaurants, and convention centers.

Wireless network is easy to set up, but if you're configuring it for the first time it could be quite a task as you may not know where to start. That's why we've put together a few setup steps and tips to help you through the process of setting up a wireless network.

Tips

When you configure a wireless network, here are a few things to keep in mind:

Centralize your router or access point

Make sure you place a router/access point at a centralized location within your network for the best performance. Try to place the router/access point as high as possible in the room, so the signal gets dispersed throughout your home. If you have a two-story home, you may need a repeater to boost the signal and extend the coverage range.

Eliminate Interference

Place home appliances such as cordless telephones, microwaves, and televisions as far away as possible from the router/access point. This would significantly reduce any interference that the appliances might cause since they may operate on the same frequency.

Wireless Encryption

Don't let your next-door neighbors or intruders connect to your wireless network. Encrypt your wireless network by turning on the router's security feature. Refer to **Wireless on page 32** for detailed information on how to set it up.

Wireless Security

This section introduces different encryption levels and types you can use to better protect your data from intruders. The router offers the following types of security protocols:

- WPA-Personal (Wi-Fi Protected Access Pre-Shared Key)
- WPA2-Personal (Wi-Fi Protected Access Pre-Shared Key)
- WPA3-Personal (Wi-Fi Protected Access Pre-Shared Key)

What is WPA?

Wi-Fi Protected Access (WPA), is a Wi-Fi standard that was designed to improve the security features of Wired Equivalent Privacy (WEP).

The 2 major improvements over WEP:

- Improved data encryption through the Temporal Key Integrity Protocol (TKIP). TKIP scrambles keys using a hashing algorithm and by adding an integrity-checking feature to ensure that the keys have not been tampered. WPA2 is based on 802.11i and uses Advanced Encryption Standard (AES) instead of TKIP.
- User authentication through the Extensible Authentication Protocol (EAP), which is generally missing in WEP. WEP regulates access to a wireless network based on a computer's hardware-specific MAC address, which is relatively simple to be sniffed out and stolen. EAP is built on a more secure public-key encryption system to ensure that only authorized network users can access the network.

WPA2-PSK/WPA3-SAE uses a passphrase or key to authenticate your wireless connection. The key is an alpha-numeric password between 8 and 63 characters long. The password can include symbols (!?*&_) and spaces. This key must be the exact same key entered on your wireless router or access point.

WPA3 has the strongest encryption among these with an increased cryptographic capability and the requirements of the Protected Management Frames (PMFs) to facilitate protection from snooping attack.

Technical Specifications

Device Interfaces

- 1 x Gigabit Ethernet WAN port
- 3 x Gigabit Ethernet LAN port
- 1 x WPS Button
- 1 x Reset Button
- 1 x Power Connector

Standards

- 2.4 GHz: IEEE 802.11ax/n/g/b¹
- 5 GHz: IEEE 802.11ax/ac/n/a¹
- Ethernet: IEEE 802.3u/ab
- Wi-Fi Management: IEEE 802.11k/v/h

Antenna Types

- 2 x 2.4 GHz internal antennas¹
- 2 x 5 GHz internal antennas¹

Security

- WPA™ - Personal
- WPA2™ - Personal
- WPA3™ - Personal

Power

- 12 V / 1A

Temperature

- Operating: 0 to 40 °C (32 to 104 °F)
- Storage: -20 to 65 °C (-4 to 149 °F)

Humidity

- Operating: 10% to 90% maximum, non-condensing
- Storage: 5% to 95% maximum, non-condensing

Certifications

- CE

Dimensions

187.4 x 104.5 x 30.8 mm (7.38 x 4.11 x 1.21 in)

Weight

241.1 g (8.5 oz)

¹ Frequency Range varies depending on country's regulation; the router does not include 5.25-5.35 GHz & 5.47-5.725 GHz in some regions.

² Maximum wireless signal rate derived from IEEE Standard 802.11ax/ac/n/g/b/a specifications. Actual performance may vary due to settings, cabling, temperature, network configuration, interface, device compatibility, environmental and on-site conditions, and other similar factors. References to power capability, signal or processing speed, frequency range, signal range or distance, data encryption, storage capacity, display properties, or other performance metrics are based on optimal conditions derived from industry standards and provided for informational purposes only.

³ Specifications may be subject to change without prior notice.

Regulatory Information

以下警語適用台灣地區

依據 低功率電波輻射性電機管理辦法

第十二條：經型式認證合格之低功率射頻電機，非經許可，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性及功能。

第十四條：低功率射頻電機之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方得繼續使用。前項合法通信，指依電信法規定作業之無線電通信。低功率射頻電機須忍受合法通信或工業、科學及醫療用電波輻射性電機設備之干擾。

1. 使用此產品時應避免影響附近雷達系統之操作。

「電磁波曝露量MPE標準值 $1\text{mW}/\text{cm}^2$ ，本產品使用時建議應距離人體 22 cm」

	Frequency Band(s) Frequenzband Fréquence bande(s) Bandas de Frecuencia Frequenza/e Frequentie(s)	Max. Output Power (EIRP) Max. Output Power Consommation d'énergie max. Potencia máxima de Salida Potenza max. Output Max. Output Power
5 G	5.15 – 5.25 GHz	200 mW
	5.25 – 5.35 GHz	200 mW
	5.47 – 5.725 GHz	1 W
2.4 G	2.4 – 2.4835 GHz	100 mW

European Community Declaration of Conformity:

Česky [Czech]	Tímto D-Link Corporation prohlašuje, že tento produkt, jeho příslušenství a software jsou v souladu se směrnicí 2014/53/EU. Celý text ES prohlášení o shodě vydaného EU a o firmwaru produktu lze stáhnout na stránkách k produktu www.dlink.com/cedoc .
Dansk [Danish]	D-Link Corporation erklærer herved, at dette produkt, tilbehør og software er i overensstemmelse med direktiv 2014/53/EU. Den fulde tekst i EU-overensstemmelseserklæringen og produktfirmware kan wnloades fra produktsiden hos www.dlink.com/cedoc .
Deutsch [German]	Hiermit erklärt die D-Link Corporation, dass dieses Produkt, das Zubehör und die Software der Richtlinie 2014/53/EU entsprechen. Der vollständige Text der Konformitätserklärung der Europäischen Gemeinschaft sowie die Firmware zum Produkt stehen Ihnen zum Herunterladen von der Produktseite im Internet auf www.dlink.com/cedoc zur Verfügung.
Eesti [Estonian]	Käesolevaga kinnitab D-Link Corporation, et see toode, tarvikud ja tarkvara on kooskõlas direktiiviga 2014/53/EL. Euroopa Liidu vastavusdeklaratsiooni täistekst ja toote püsivara on allalaadimiseks saadaval tootelehel www.dlink.com/cedoc

NOTICE OF WIRELESS RADIO LAN USAGE IN THE EUROPEAN COMMUNITY (FOR WIRELESS PRODUCT ONLY):

- This device is restricted to indoor use when operated in the European Community using channels in the 5.15-5.35 GHz band to reduce the potential for interference.
- This device is a 2.4 GHz wideband transmission system (transceiver), intended for use in all EU member states and EFTA countries. This equipment may be operated in AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, PL, PT, RO, SM, SE, RS, SK, ES, CI, HU, and CY.

Usage Notes:

- To remain in conformance with European National spectrum usage regulations, frequency and channel limitations will be applied on the products according to the country where the equipment will be deployed.
- This device is restricted from functioning in Ad-hoc mode while operating in 5 GHz. Ad-hoc mode is direct peer-to-peer communication between two client devices without an Access Point.
- Access points will support DFS (Dynamic Frequency Selection) and TPC (Transmit Power Control) functionality as required when operating in 5 GHz band within the EU.
- Please refer to the product manual or datasheet to check whether your product uses 2.4 GHz and/or 5 GHz wireless.

CE EMI CLASS A WARNING (only for class A product)

This equipment is compliant with Class A of EN 55032. In a residential environment this equipment may cause radio interference.

HINWEIS ZUR VERWENDUNG VON DRAHTLOS-NETZWERK (WLAN) IN DER EUROPÄISCHEN GEMEINSCHAFT (NUR FÜR EIN DRAHTLOSES PRODUKT)

- Der Betrieb dieses Geräts in der Europäischen Gemeinschaft bei Nutzung von Kanälen im 5,15-5,35 GHz Frequenzband ist ausschließlich auf Innenräume beschränkt, um das Interferenzpotential zu reduzieren.
- Bei diesem Gerät handelt es sich um ein zum Einsatz in allen EU-Mitgliedsstaaten und in EFTA-Ländern - ausgenommen Frankreich. Der Betrieb dieses Geräts ist in den folgenden Ländern erlaubt: AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, PL, PT, RO, SM, SE, RS, SK, ES, CI, HU, CY

Gebrauchshinweise:

- Um den in Europa geltenden nationalen Vorschriften zum Nutzen des Funkspektrums weiterhin zu entsprechen, werden Frequenz und Kanalbeschränkungen, dem jeweiligen Land, in dem das Gerät zum Einsatz kommt, entsprechend, auf die Produkte angewandt.
- Die Funktionalität im Ad-hoc-Modus bei Betrieb auf 5 GHz ist für dieses Gerät eingeschränkt. Bei dem Ad-hoc-Modus handelt es sich um eine Peer-to-Peer-Kommunikation zwischen zwei Client-Geräten ohne einen Access Point.
- Access Points, die 5 GHz unterstützen, unterstützen die Funktionen DFS (Dynamic Frequency Selection/Dynamische Frequenzauswahl) und TPC (Transmit Power Control/Regelung der Sendeleistung bei Funksystemen mit mobilen Teilnehmern), die bei dem Betrieb in 5 GHz innerhalb der Europäischen Gemeinschaft erforderlich sind.
- Bitte lesen Sie das Produkthandbuch oder das Datenblatt um zu erfahren, ob Ihr Produkt 2,4 GHz, 5.8 GHz einzeln oder kombiniert verwendet.

WARNUNG ZUR CE EMI KLASSE A (gilt nur für Produkte der Klasse A)

Dieses Gerät entspricht Klasse A der EN 55032. In einer Wohngeländeumgebung kann dieses Gerät Funkstörungen verursachen.

AVIS CONCERNANT L'UTILISATION DE LA RADIO SANS FIL LAN DANS LA COMMUNAUTÉ EUROPÉENNE (UNIQUEMENT POUR LES PRODUITS SANS FIL)

- Cet appareil est limité à un usage intérieur lorsqu'il est utilisé dans la Communauté européenne sur les canaux de la bande de 5,15 à 5,35 GHz afin de réduire les risques d'interférences.
- Cet appareil est un système de transmission à large bande (émetteur-récepteur) de 2,4 GHz, destiné à être utilisé dans tous les États-membres de l'UE et les pays de l'AELE. Cet équipement peut être utilisé dans les pays suivants : AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, PL, PT, RO, SM, SE, RS, SK, ES, CI, HU, CY

Notes d'utilisation:

- Pour rester en conformité avec la réglementation nationale européenne en matière d'utilisation du spectre, des limites de fréquence et de canal seront appliquées aux produits selon le pays où l'équipement sera déployé.
- Cet appareil ne peut pas utiliser le mode Ad-hoc lorsqu'il fonctionne dans la bande de 5 GHz. Le mode Adhoc fournit une communication directe pair à pair entre deux périphériques clients sans point d'accès.
- Les points d'accès prendront en charge les fonctionnalités DFS (Dynamic Frequency Selection) et TPC (Transmit Power Control) au besoin lors du fonctionnement dans la bande de 5 GHz au sein de l'UE.
- Veuillez consulter le manuel ou la fiche technique du produit pour vérifier si votre produit utilise 2,4 GHz, 5 GHz ou tous.

AVISO DE USO DE LA LAN DE RADIO INALÁMBRICA EN LA COMUNIDAD EUROPEA (SOLO PARA EL PRODUCTO INALÁMBRICO)

- El uso de este dispositivo está restringido a interiores cuando funciona en la Comunidad Europea utilizando canales en la banda de 5,15-5,35 GHz, para reducir la posibilidad de interferencias.
- Este dispositivo es un sistema de transmisión (transceptor) de banda ancha de 2,4 GHz, pensado para su uso en todos los estados miembros de la UE y en los países de la AELC. Este equipo se puede utilizar en AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, PL, PT, RO, SM, SE, RS, SK, ES, CI, HU, CY

Notas de uso:

- Para seguir cumpliendo las normas europeas de uso del espectro nacional, se aplicarán limitaciones de frecuencia y canal en los productos en función del país en el que se pondrá en funcionamiento el equipo.
- Este dispositivo tiene restringido el funcionamiento en modo Ad-hoc mientras funcione a 5 Ghz. El modo Ad-hoc es la comunicación directa de igual a igual entre dos dispositivos cliente sin un punto de acceso.
- Los puntos de acceso admitirán la funcionalidad DFS (Selección de frecuencia dinámica) y TPC (Control de la potencia de transmisión) si es necesario cuando funcionan a 5 Ghz dentro de la UE.
- Por favor compruebe el manual o la ficha de producto para comprobar si el producto utiliza las bandas inalámbricas de 2.4 GHz y/o la de 5 GHz.

AVERTISSEMENT CE EMI CLASSE A (uniquement pour les produits de classe A)

AVVISO PER L'USO DI LAN RADIO WIRELESS NELLA COMUNITÀ EUROPEA (SOLO PER PRODOTTI WIRELESS)

- Nella Comunità europea, l'uso di questo dispositivo è limitato esclusivamente agli ambienti interni sui canali compresi nella banda da 5,15 a 5,35 GHz al fine di ridurre potenziali interferenze. Questo dispositivo è un sistema di trasmissione a banda larga a 2,4 GHz (ricetrasmittente), destinato all'uso in tutti gli stati membri dell'Unione europea e nei paesi EFTA.
- Questo dispositivo può essere utilizzato in AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, PL, PT, RO, SM, SE, RS, SK, ES, CI, HU, CY

Note per l'uso

- Al fine di mantenere la conformità alle normative nazionali europee per l'uso dello spettro di frequenze, saranno applicate limitazioni sulle frequenze e sui canali per il prodotto in conformità alle normative del paese in cui il dispositivo viene utilizzato.
- Questo dispositivo non può essere attivato in modalità Ad-hoc durante il funzionamento a 5 GHz. La modalità Ad-hoc è una comunicazione diretta peer-to-peer fra due dispositivi client senza un punto di accesso.
- I punti di accesso supportano le funzionalità DFS (Dynamic Frequency Selection) e TPC (Transmit Power Control) richieste per operare a 5 GHz nell'Unione europea.
- Consultare il manuale del prodotto o la scheda tecnica per verificare se il prodotto utilizza 2,4 GHz, 5 GHz o tutti.

CE EMI CLASSE A AVVISO (solo per prodotti di classe A)

La presente apparecchiatura è conforme alla Classe A di EN 55032. In ambienti residenziali, questa apparecchiatura potrebbe causare interferenze radio.

KENNISGEVING VAN DRAADLOOS RADIO LAN-GEBRUIK IN DE EUROPESE GEMEENSCHAP (ALLEEN VOOR DRAADLOOS PRODUCT)

- Dit toestel is beperkt tot gebruik binnenshuis wanneer het wordt gebruikt in de Europese Gemeenschap gebruik makend van kanalen in de 5.15-5.35 GHz band om de kans op interferentie te beperken.
- Dit toestel is een 2.4 GHz breedband transmissiesysteem (transceiver) dat bedoeld is voor gebruik in alle EU lidstaten en EFTA landen. Deze uitrusting mag gebruikt worden in AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, PL, PT, RO, SM, SE, RS, SK, ES, CI, HU, CY

Gebruiksaanwijzingen:

- Om de gebruiksvoorschriften van het Europese Nationale spectrum na te leven, zullen frequentie- en kanaalbeperkingen worden toegepast op de producten volgens het land waar de uitrusting gebruikt zal worden.
- Dit toestel kan niet functioneren in Ad-hoc mode wanneer het gebruikt wordt in 5 GHz. Ad-hoc mode is directe peer-to-peer communicatie tussen twee klantenapparaten zonder een toegangspunt.
- Toegangspunten ondersteunen DFS (Dynamic Frequency Selection) en TPC (Transmit Power Control) functionaliteit zoals vereist bij gebruik in 5 GHz binnen de EU.
- Raadpleeg de producthandleiding of datasheet om te controleren of uw product 2,4 GHz, 5 GHz of alle frequenties gebruikt.

CE EMI KLASSE A-WAARSCHUWING (alleen voor klasse A-producten)

Dit apparaat voldoet aan Klasse A van EN 55032. Dit apparaat kan in een woonomgeving radio-interferentie veroorzaken.

SAFETY INSTRUCTIONS

The following general safety guidelines are provided to help ensure your own personal safety and protect your product from potential damage. Remember to consult the product user instructions for more details.

- Static electricity can be harmful to electronic components. Discharge static electricity from your body (i.e. touching grounded bare metal) before touching the product.
- Do not attempt to service the product and never disassemble the product. For some products with a user replaceable battery, please read and follow the instructions in the user manual.
- Do not spill food or liquid on your product and never push any objects into the openings of your product.
- Do not use this product near water, areas with high humidity, or condensation unless the product is specifically rated for outdoor application.
- Keep the product away from radiators and other heat sources.
- Always unplug the product from mains power before cleaning and use a dry lint free cloth only.

SICHERHEITSVORSCHRIFTEN

Die folgenden allgemeinen Sicherheitsvorschriften dienen als Hilfe zur Gewährleistung Ihrer eigenen Sicherheit und zum Schutz Ihres Produkts. Weitere Details finden Sie in den Benutzeranleitungen zum Produkt.

- Statische Elektrizität kann elektronischen Komponenten schaden. Um Schäden durch statische Aufladung zu vermeiden, leiten Sie elektrostatische Ladungen von Ihrem Körper ab, (z. B. durch Berühren eines geerdeten blanken Metallteils), bevor Sie das Produkt berühren.
- Unterlassen Sie jeden Versuch, das Produkt zu warten, und versuchen Sie nicht, es in seine Bestandteile zu zerlegen. Für einige Produkte mit austauschbaren Akkus lesen Sie bitte das Benutzerhandbuch und befolgen Sie die dort beschriebenen Anleitungen.
- Vermeiden Sie, dass Speisen oder Flüssigkeiten auf Ihr Produkt gelangen, und stecken Sie keine Gegenstände in die Gehäuseschlitze oder -öffnungen Ihres Produkts.
- Verwenden Sie dieses Produkt nicht in unmittelbarer Nähe von Wasser und nicht in Bereichen mit hoher Luftfeuchtigkeit oder Kondensation, es sei denn, es ist speziell zur Nutzung in Außenbereichen vorgesehen und eingestuft.
- Halten Sie das Produkt von Heizkörpern und anderen Quellen fern, die Wärme erzeugen.
- Trennen Sie das Produkt immer von der Stromzufuhr, bevor Sie es reinigen und verwenden Sie dazu ausschließlich ein trockenes fusselfreies Tuch.

CONSIGNES DE SÉCURITÉ

Les consignes générales de sécurité ci-après sont fournies afin d'assurer votre sécurité personnelle et de protéger le produit d'éventuels dommages. Veuillez consulter les consignes d'utilisation du produit pour plus de détails.

- L'électricité statique peut endommager les composants électroniques. Déchargez l'électricité statique de votre corps (en touchant un objet en métal relié à la terre par exemple) avant de toucher le produit.
- N'essayez pas d'intervenir sur le produit et ne le démontez jamais. Pour certains produits contenant une batterie remplaçable par l'utilisateur, veuillez lire et suivre les consignes contenues dans le manuel d'utilisation.
- Ne renversez pas d'aliments ou de liquide sur le produit et n'insérez jamais d'objets dans les orifices.
- N'utilisez pas ce produit à proximité d'un point d'eau, de zones très humides ou de condensation sauf si le produit a été spécifiquement conçu pour une application extérieure.
- Éloignez le produit des radiateurs et autres sources de chaleur.
- Débranchez toujours le produit de l'alimentation avant de le nettoyer et utilisez uniquement un chiffon sec non pelucheux.

INSTRUCCIONES DE SEGURIDAD

Las siguientes directrices de seguridad general se facilitan para ayudarle a garantizar su propia seguridad personal y para proteger el producto frente a posibles daños. No olvide consultar las instrucciones del usuario del producto para obtener más información.

- La electricidad estática puede resultar nociva para los componentes electrónicos. Descargue la electricidad estática de su cuerpo (p. ej., tocando algún metal sin revestimiento conectado a tierra) antes de tocar el producto.
- No intente realizar el mantenimiento del producto ni lo desmonte nunca. Para algunos productos con batería reemplazable por el usuario, lea y siga las instrucciones del manual de usuario.
- No derrame comida o líquidos sobre el producto y nunca deje que caigan objetos en las aberturas del mismo.
- No utilice este producto cerca del agua, en zonas con humedad o condensación elevadas a menos que el producto esté clasificado específicamente para aplicación en exteriores.
- Mantenga el producto alejado de los radiadores y de otras fuentes de calor.
- Desenchufe siempre el producto de la alimentación de red antes de limpiarlo y utilice solo un paño seco sin pelusa.

ISTRUZIONI PER LA SICUREZZA

Le seguenti linee guida sulla sicurezza sono fornite per contribuire a garantire la sicurezza personale degli utenti e a proteggere il prodotto da potenziali danni. Per maggiori dettagli, consultare le istruzioni per l'utente del prodotto.

- L'elettricità statica può essere pericolosa per i componenti elettronici. Scaricare l'elettricità statica dal corpo (ad esempio toccando una parte metallica collegata a terra) prima di toccare il prodotto.
- Non cercare di riparare il prodotto e non smontarlo mai. Per alcuni prodotti dotati di batteria sostituibile dall'utente, leggere e seguire le istruzioni riportate nel manuale dell'utente.
- Non versare cibi o liquidi sul prodotto e non spingere mai alcun oggetto nelle aperture del prodotto.
- Non usare questo prodotto vicino all'acqua, in aree con elevato grado di umidità o soggette a condensa a meno che il prodotto non sia specificatamente approvato per uso in ambienti esterni.
- Tenere il prodotto lontano da caloriferi e altre fonti di calore.
- Scollegare sempre il prodotto dalla presa elettrica prima di pulirlo e usare solo un panno asciutto che non lasci filacce.

VEILIGHEIDSinFORMATIE

De volgende algemene veiligheidsinformatie werd verstrekt om uw eigen persoonlijke veiligheid te waarborgen en uw product te beschermen tegen mogelijke schade. Denk eraan om de gebruikersinstructies van het product te raadplegen voor meer informatie.

- Statische elektriciteit kan schadelijk zijn voor elektronische componenten. Ontlaad de statische elektriciteit van uw lichaam (d.w.z. het aanraken van geaard bloot metaal) voordat u het product aanraakt.
- U mag nooit proberen het product te onderhouden en u mag het product nooit demonteren. Voor sommige producten met door de gebruiker te vervangen batterij, dient u de instructies in de gebruikershandleiding te lezen en te volgen.
- Mors geen voedsel of vloeistof op uw product en u mag nooit voorwerpen in de openingen van uw product duwen.
- Gebruik dit product niet in de buurt van water, gebieden met hoge vochtigheid of condensatie, tenzij het product specifiek geclassificeerd is voor gebruik buitenshuis.
- Houd het product uit de buurt van radiators en andere warmtebronnen.
- U dient het product steeds los te koppelen van de stroom voordat u het reinigt en gebruik uitsluitend een droge pluisvrije doek.

Disposing and Recycling Your Product

EN

ENGLISH

This symbol on the product or packaging means that according to local laws and regulations this product should not be disposed of in household waste but sent for recycling. Please take it to a collection point designated by your local authorities once it has reached the end of its life, some will accept products for free. By recycling the product and its packaging in this manner you help to conserve the environment and protect human health.

D-Link and the Environment

At D-Link, we understand and are committed to reducing any impact our operations and products may have on the environment. To minimise this impact D-Link designs and builds its products to be as environmentally friendly as possible, by using recyclable, low toxic materials in both products and packaging.

D-Link recommends that you always switch off or unplug your D-Link products when they are not in use. By doing so you will help to save energy and reduce CO2 emissions.

To learn more about our environmentally responsible products and packaging please visit www.dlinkgreen.com.

DEUTSCH

DE

Dieses Symbol auf dem Produkt oder der Verpackung weist darauf hin, dass dieses Produkt gemäß bestehender örtlicher Gesetze und Vorschriften nicht über den normalen Hausmüll entsorgt werden sollte, sondern einer Wiederverwertung zuzuführen ist. Bringen Sie es bitte zu einer von Ihrer Kommunalbehörde entsprechend amtlich ausgewiesenen Sammelstelle, sobald das Produkt das Ende seiner Nutzungsdauer erreicht hat. Für die Annahme solcher Produkte erheben einige dieser Stellen keine Gebühren. Durch ein auf diese Weise durchgeführtes Recycling des Produkts und seiner Verpackung helfen Sie, die Umwelt zu schonen und die menschliche Gesundheit zu schützen.

D-Link und die Umwelt

D-Link ist sich den möglichen Auswirkungen seiner Geschäftstätigkeiten und seiner Produkte auf die Umwelt bewusst und fühlt sich verpflichtet, diese entsprechend zu mindern. Zu diesem Zweck entwickelt und stellt D-Link seine Produkte mit dem Ziel größtmöglicher Umweltfreundlichkeit her und verwendet wiederverwertbare, schadstoffarme Materialien bei Produktherstellung und Verpackung.

D-Link empfiehlt, Ihre Produkte von D-Link, wenn nicht in Gebrauch, immer auszuschalten oder vom Netz zu nehmen. Auf diese Weise helfen Sie, Energie zu sparen und CO2-Emissionen zu reduzieren.

Wenn Sie mehr über unsere umweltgerechten Produkte und Verpackungen wissen möchten, finden Sie entsprechende Informationen im Internet unter www.dlinkgreen.com.

FRANÇAIS**FR**

Ce symbole apposé sur le produit ou son emballage signifie que, conformément aux lois et réglementations locales, ce produit ne doit pas être éliminé avec les déchets domestiques mais recyclé. Veuillez le rapporter à un point de collecte prévu à cet effet par les autorités locales; certains accepteront vos produits gratuitement. En recyclant le produit et son emballage de cette manière, vous aidez à préserver l'environnement et à protéger la santé de l'homme.

D-Link et l'environnement

Chez D-Link, nous sommes conscients de l'impact de nos opérations et produits sur l'environnement et nous engageons à le réduire. Pour limiter cet impact, D-Link conçoit et fabrique ses produits de manière aussi écologique que possible, en utilisant des matériaux recyclables et faiblement toxiques, tant dans ses produits que ses emballages.

D-Link recommande de toujours éteindre ou débrancher vos produits D-Link lorsque vous ne les utilisez pas. Vous réaliserez ainsi des économies d'énergie et réduirez vos émissions de CO2.

Pour en savoir plus sur les produits et emballages respectueux de l'environnement, veuillez consulter le www.dlinkgreen.com.

ESPAÑOL**ES**

Este símbolo en el producto o el embalaje significa que, de acuerdo con la legislación y la normativa local, este producto no se debe desechar en la basura doméstica sino que se debe reciclar. Llévelo a un punto de recogida designado por las autoridades locales una vez que ha llegado al fin de su vida útil; algunos de ellos aceptan recogerlos de forma gratuita. Al reciclar el producto y su embalaje de esta forma, contribuye a preservar el medio ambiente y a proteger la salud de los seres humanos.

D-Link y el medio ambiente

En D-Link, comprendemos y estamos comprometidos con la reducción del impacto que puedan tener nuestras actividades y nuestros productos en el medio ambiente. Para reducir este impacto, D-Link diseña y fabrica sus productos para que sean lo más ecológicos posible, utilizando materiales reciclables y de baja toxicidad tanto en los productos como en el embalaje.

D-Link recomienda apagar o desenchufar los productos D-Link cuando no se estén utilizando. Al hacerlo, contribuirá a ahorrar energía y a reducir las emisiones de CO2.

Para obtener más información acerca de nuestros productos y embalajes ecológicos, visite el sitio www.dlinkgreen.com.

ITALIANO**IT**

La presenza di questo simbolo sul prodotto o sulla confezione del prodotto indica che, in conformità alle leggi e alle normative locali, questo prodotto non deve essere smaltito nei rifiuti domestici, ma avviato al riciclo. Una volta terminato il ciclo di vita utile, portare il prodotto presso un punto di raccolta indicato dalle autorità locali. Alcuni questi punti di raccolta accettano gratuitamente i prodotti da riciclare. Scegliendo di riciclare il prodotto e il relativo imballaggio, si contribuirà a preservare l'ambiente e a salvaguardare la salute umana.

D-Link e l'ambiente

D-Link cerca da sempre di ridurre l'impatto ambientale dei propri stabilimenti e dei propri prodotti. Allo scopo di ridurre al minimo tale impatto, D-Link progetta e realizza i propri prodotti in modo che rispettino il più possibile l'ambiente, utilizzando materiali riciclabili a basso tasso di tossicità sia per i prodotti che per gli imballaggi.

D-Link raccomanda di spegnere sempre i prodotti D-Link o di scollegarne la spina quando non vengono utilizzati. In questo modo si contribuirà a risparmiare energia e a ridurre le emissioni di anidride carbonica.

Per ulteriori informazioni sui prodotti e sugli imballaggi D-Link a ridotto impatto ambientale, visitate il sito all'indirizzo www.dlinkgreen.com.

NEDERLANDS**NL**

Dit symbool op het product of de verpakking betekent dat dit product volgens de plaatselijke wetgeving niet mag worden weggegooid met het huishoudelijk afval, maar voor recyclage moeten worden ingeleverd. Zodra het product het einde van de levensduur heeft bereikt, dient u het naar een inzamelpunt te brengen dat hiertoe werd aangeduid door uw plaatselijke autoriteiten, sommige autoriteiten accepteren producten zonder dat u hiervoor dient te betalen. Door het product en de verpakking op deze manier te recyclen helpt u het milieu en de gezondheid van de mens te beschermen.

D-Link en het milieu

Bij D-Link spannen we ons in om de impact van onze handelingen en producten op het milieu te beperken. Om deze impact te beperken, ontwerpt en bouwt D-Link zijn producten zo milieuvriendelijk mogelijk, door het gebruik van recycleerbare producten met lage toxiciteit in product en verpakking.

D-Link raadt aan om steeds uw D-Link producten uit te schakelen of uit de stekker te halen wanneer u ze niet gebruikt. Door dit te doen bespaart u energie en beperkt u de CO₂-emissies.

Breng een bezoek aan www.dlinkgreen.com voor meer informatie over onze milieuverantwoorde producten en verpakkingen.

POLSKI**PL**

Ten symbol umieszczony na produkcie lub opakowaniu oznacza, że zgodnie z miejscowym prawem i lokalnymi przepisami niniejszego produktu nie wolno wyrzucać jak odpady czy śmieci z gospodarstwa domowego, lecz należy go poddać procesowi recyklingu. Po zakończeniu użytkowania produktu, niektóre odpowiednie do tego celu podmioty przyjmą takie produkty nieodpłatnie, dlatego prosimy dostarczyć go do punktu zbiórki wskazanego przez lokalne władze. Poprzez proces recyklingu i dzięki takiemu postępowaniu z produktem oraz jego opakowaniem, pomogą Państwo chronić środowisko naturalne i dbać o ludzkie zdrowie.

D-Link i środowisko

D-Link podchodzimy w sposób świadomy do ochrony otoczenia oraz jesteśmy zaangażowani w zmniejszanie wpływu naszych działań i produktów na środowisko naturalne. W celu zminimalizowania takiego wpływu firma D-Link konstruuje i wytwarza swoje produkty w taki sposób, aby były one jak najbardziej przyjazne środowisku, stosując do tych celów materiały nadające się do powtórnego wykorzystania, charakteryzujące się małą toksycznością zarówno w przypadku samych produktów jak i opakowań.

Firma D-Link zaleca, aby Państwo zawsze prawidłowo wyłączali z użytku swoje produkty D-Link, gdy nie są one wykorzystywane. Postępując w ten sposób pozwalają Państwo oszczędzać energię i zmniejszać emisje CO₂.

Aby dowiedzieć się więcej na temat produktów i opakowań mających wpływ na środowisko prosimy zapoznać się ze stroną Internetową www.dlinkgreen.com.

ČESKY**CZ**

Tento symbol na výrobku nebo jeho obalu znamená, že podle místně platných předpisů se výrobek nesmí vyhazovat do komunálního odpadu, ale odeslat k recyklaci. Až výrobek doslouží, odnese jej prosím na sběrné místo určené místními úřady k tomuto účelu. Některá sběrná místa přijímají výrobky zdarma. Recyklací výrobku i obalu pomáháte chránit životní prostředí i lidské zdraví.

D-Link a životní prostředí

Ve společnosti D-Link jsme si vědomi vlivu našich provozů a výrobků na životní prostředí a snažíme se o minimalizaci těchto vlivů. Proto své výrobky navrhujeme a vyrábíme tak, aby byly co nejekologičtější, a ve výrobcích i obalech používáme recyklovatelné a nízkotoxické materiály.

Společnost D-Link doporučuje, abyste své výrobky značky D-Link vypnuli nebo vytáhli ze zásuvky vždy, když je nepoužíváte. Pomůžete tak šetřit energii a snížit emise CO₂.

Více informací o našich ekologických výrobcích a obalech najdete na adrese www.dlinkgreen.com.

MAGYAR**HU**

Ez a szimbólum a terméken vagy a csomagoláson azt jelenti, hogy a helyi törvényeknek és szabályoknak megfelelően ez a termék nem semmisíthető meg a háztartási hulladékkal együtt, hanem újrahasznosításra kell küldeni. Kérjük, hogy a termék élettartamának elteltét követően vigye azt a helyi hatóság által kijelölt gyűjtőhelyre. A termékek egyes helyeken ingyen elhelyezhetők. A termék és a csomagolás újrahasznosításával segíti védeni a környezetet és az emberek egészségét.

A D-Link és a környezet

A D-Linknél megértjük és elköteleztük magunkat a műveleteink és termékeink környezetre gyakorolt hatásainak csökkentésére. Az ezen hatás csökkentése érdekében a D-Link a lehető leginkább környezetbarát termékeket tervez és gyárt azáltal, hogy újrahasznosítható, alacsony károsanyag-tartalmú termékeket gyárt és csomagolásokat alkalmaz.

A D-Link azt javasolja, hogy mindig kapcsolja ki vagy húzza ki a D-Link termékeket a tápforrásból, ha nem használja azokat. Ezzel segít az energia megtakarításában és a széndioxid kibocsátásának csökkentésében.

Környezetbarát termékeinkről és csomagolásainkról további információkat a www.dlinkgreen.com weboldalon tudhat meg.

NORSK**NO**

Dette symbolet på produktet eller forpakningen betyr at dette produktet ifølge lokale lover og forskrifter ikke skal kastes sammen med husholdningsavfall, men leveres inn til gjenvinning. Vennligst ta det til et innsamlingssted anvist av lokale myndigheter når det er kommet til slutten av levetiden. Noen steder aksepteres produkter uten avgift. Ved på denne måten å gjenvinne produktet og forpakningen hjelper du å verne miljøet og beskytte folks helse.

D-Link og miljøet

Hos D-Link forstår vi oss på og er forpliktet til å minske innvirkningen som vår drift og våre produkter kan ha på miljøet. For å minimalisere denne innvirkningen designer og lager D-Link produkter som er så miljøvennlig som mulig, ved å bruke resirkulerbare, lav-toksiske materialer både i produktene og forpakningen.

D-Link anbefaler at du alltid slår av eller frakobler D-Link-produkter når de ikke er i bruk. Ved å gjøre dette hjelper du å spare energi og å redusere CO2-utslipp.

For mer informasjon angående våre miljøansvarlige produkter og forpakninger kan du gå til www.dlinkgreen.com.

DANSK**DK**

Dette symbol på produktet eller emballagen betyder, at dette produkt i henhold til lokale love og regler ikke må bortskaffes som husholdningsaffald, mens skal sendes til genbrug. Indlever produktet til et indsamlingssted som angivet af de lokale myndigheder, når det er nået til slutningen af dets levetid. I nogle tilfælde vil produktet blive modtaget gratis. Ved at indlevere produktet og dets emballage til genbrug på denne måde bidrager du til at beskytte miljøet og den menneskelige sundhed.

D-Link og miljøet

Hos D-Link forstår vi og bestræber os på at reducere enhver indvirkning, som vores aktiviteter og produkter kan have på miljøet. For at minimere denne indvirkning designer og producerer D-Link sine produkter, så de er så miljøvenlige som muligt, ved at bruge genanvendelige materialer med lavt giftighedsniveau i både produkter og emballage.

D-Link anbefaler, at du altid slukker eller frakobler dine D-Link-produkter, når de ikke er i brug. Ved at gøre det bidrager du til at spare energi og reducere CO₂-udledningerne.

Du kan finde flere oplysninger om vores miljømæssigt ansvarlige produkter og emballage på www.dlinkgreen.com.

SUOMI**FI**

Tämä symboli tuotteen pakkauksessa tarkoittaa, että paikallisten lakien ja säännösten mukaisesti tätä tuotetta ei pidä hävittää yleisen kotitalousjätteen seassa vaan se tulee toimittaa kierrätettäväksi. Kun tuote on elinkaarensa päässä, toimita se lähimpään viranomaisten hyväksymään kierrätyspisteeseen. Kierrättämällä käytetyn tuotteen ja sen pakkauksen autat tukemaan sekä ympäristön että ihmisten terveyttä ja hyvinvointia.

D-Link ja ympäristö

D-Link ymmärtää ympäristönsuojelun tärkeyden ja on sitoutunut vähentämään tuotteistaan ja niiden valmistuksesta ympäristölle mahdollisesti aiheutuvia haittavaikutuksia. Nämä negatiiviset vaikutukset minimoidakseen D-Link suunnittelee ja valmistaa tuotteensa mahdollisimman ympäristöystävällisiksi käyttämällä kierrätettäviä, alhaisia pitoisuuksia haitallisia aineita sisältäviä materiaaleja sekä tuotteissaan että niiden pakkauksissa.

Suosittellemme, että irrotat D-Link-tuotteesi virtalähteestä tai sammutat ne aina, kun ne eivät ole käytössä. Toimimalla näin autat säästämään energiaa ja vähentämään hiilidioksiidipäästöjä.

Lue lisää ympäristöystävällisistä D-Link-tuotteista ja pakkauksistamme osoitteesta www.dlinkgreen.com.

SVENSKA**SE**

Den här symbolen på produkten eller förpackningen betyder att produkten enligt lokala lagar och föreskrifter inte skall kastas i hushållssoporna utan i stället återvinnas. Ta den vid slutet av dess livslängd till en av din lokala myndighet utsedd uppsamlingsplats, vissa accepterar produkter utan kostnad. Genom att på detta sätt återvinna produkten och förpackningen hjälper du till att bevara miljön och skydda människors hälsa.

D-Link och miljön

På D-Link förstår vi och är fast beslutna att minska den påverkan våra verksamheter och produkter kan ha på miljön. För att minska denna påverkan utformar och bygger D-Link sina produkter för att de ska vara så miljövänliga som möjligt, genom att använda återvinningsbara material med låg gifthalt i både produkter och förpackningar.

D-Link rekommenderar att du alltid stänger av eller kopplar ur dina D-Link produkter när du inte använder dem. Genom att göra detta hjälper du till att spara energi och minska utsläpp av koldioxid.

För mer information om våra miljöansvariga produkter och förpackningar www.dlinkgreen.com.

PORTUGUÊS**PT**

Este símbolo no produto ou embalagem significa que, de acordo com as leis e regulamentações locais, este produto não deverá ser eliminado juntamente com o lixo doméstico mas enviado para a reciclagem. Transporte-o para um ponto de recolha designado pelas suas autoridades locais quando este tiver atingido o fim da sua vida útil, alguns destes pontos aceitam produtos gratuitamente. Ao reciclar o produto e respectiva embalagem desta forma, ajuda a preservar o ambiente e protege a saúde humana.

A D-Link e o ambiente

Na D-Link compreendemos e comprometemo-nos com a redução do impacto que as nossas operações e produtos possam ter no ambiente. Para minimizar este impacto a D-Link concebe e constrói os seus produtos para que estes sejam o mais inofensivos para o ambiente possível, utilizando materiais recicláveis e não tóxicos tanto nos produtos como nas embalagens.

A D-Link recomenda que desligue os seus produtos D-Link quando estes não se encontrarem em utilização. Com esta acção ajudará a poupar energia e reduzir as emissões de CO₂.

Para saber mais sobre os nossos produtos e embalagens responsáveis a nível ambiental visite www.dlinkgreen.com.
