DIR-826L Firmware Release Notes

Firmware: FW v1.05
Hardware: Rev.Ax
Date: 2014/07/31

Problems Resolved:

Resolve Wizard issue. While Internet checking, before mydlink registration, under special ISP environment, may hang and resulted in checking failed.
Resolve files in USB drive larger than 4GB, incorrect file size may displayed from samba (Windows File Sharing).

Enhancements:

UPnP AV Media Server support (DLNA) support.
Enhance stability.
Enhance compatibility with SharePort Mobile.
Enhance compatibility with QRS Mobile.
Enhance compatibility with latest SharePort plus software.

Know Issues:

5GHz Dynamic Frequency Selection (DFS) channels is now enabled for DIR-826L sold in U.S., but disabled in default. If you wish to use DFS channel, and after confirming your dual band Wi-Fi adapter supports DFS, please help to enable it in the Advanced -> Advanced Wireless.
